SUMMARY

Full Stack Software Engineer with 2 years of experience in React and TypeScript, and 1.5 years in React Native and Google Cloud. Specialised in building scalable social network applications with expertise in design programming tools such as Figma and Tailwind.

Proven track record in launching and scaling applications with a focus on performance and user experience. Seeking full-time opportunities in Berlin, Germany

WORK EXPERIENCE

Full Stack_Mobile Developer - DARE Zone

June 2023 – Present

- Grew the app from launch to over 40,000 active users across 5 regions within the first year
- Ensured timely feature deployment and bug fixes, maintaining a 4.3-star rating in the US
- Improved reliability through JEST and React Native Testing Library, achieving 99.97% crash-free sessions
- Contributed 5000+ commits, honing skills in React Native, TypeScript, Node.js, Firebase, and Tailwind
- Applied new design practices using Figma, Tailwind, and animation libraries such as React Spring, improving app functionality and user experience

Software Engineer - 100Devs

May 2022 – June 2023

- Collaborated with a team to build modern, responsive web applications using React, TypeScript, and Node.js
- Developed full-stack applications with well-structured code and seamless user experiences
- Applied agile methodologies such as SCRUM for efficient project management and delivery

Full Stack Web Developer - JoeWhoCodes

May 2022 – June 2023

- Built full-stack web applications and static websites for small to medium-sized businesses
- Consulted clients on SEO strategies and social media marketing to enhance online presence
- Delivered custom solutions for diverse industries, focusing on responsive design and performance
