WORK EXPERIENCE

Junior Front End Mobile Developer - DareZone

June 2023 – Present

- Developing new features using React Native and TypeScript and ensuring cross-platform compatibility
- Managing deployment of app updates to App and Play Stores
- Updating backend systems with Node.js, Google Cloud and Firebase
- Testing and debugging with JEST and React Native Testing Library
- Utilising Figma to implement user interfaces based on wireframes and design specifications
- Building internal workflows with Retool
- Utilizing industry-standard practices such as Git and agile methodologies

Software Engineer - 100Devs

May 2022 – June 2023

- Collaborating with a team of developers to build modern and responsive web applications using best practices
- Building semantically structured full stack web applications
- Applying agile methodologies like SCRUM for project management

Full Stack Web Developer - JoeWhoCodes

May 2022 – Present

- Creating full stack web applications and static websites for different clients across small and medium size businesses. Also, consulted on SEO and social media strategy.

Projects:

No Strings Attached (Full Stack Web App) - MERN Stack Application with authentication - allows users to create profiles, search for and connect with other musicians in their area.
Tech used: MERN Stack, React, Redux, Node.js, MongoDB.

ChatterBox (React Native App) - Mobile chat app which allows you to chat to random strangers across the world. Fully integrated Firebase backend. Find a chat and join, or create your own and let people find it.
Tech used: React Native, TypeScript, Firebase.

Other Projects: Pomodoro Joe, The Burrows Bed and Breakfast, MovieGoJoe, NoStrings Seeder, CarJam, Coley Creates, Crazy Skins, JoeWhoCodes Portfolio
